

Peabody’s Winter Zoo-tastic Reading Challenge!

Peabody students are reading their way through our 8-week Zoo-tastic Winter Reading Challenge (January 6 to March 3) during which they color in (or put an X) a book below for every picture book (or 10 minutes of a chapter book) they read. When this log of 10 books (or 100 minutes) is complete, a new reading log for the next animal habitat will be sent home. Our goal? Let’s read through 8,000 books in 8 weeks this winter and look forward to a fun animal adventure day in the spring! Students who read all the way through 8 habitats, can do the zoo-tastic journey more than once! To clarify, they can read ANY book of their choice!

Read a book – Color or X a book!	<i>Optional: Book Title</i> (also optional – color the animal!)

Fun Facts about African Tropical Rainforest

- The animals above include mountain gorilla, tree pangolin, okapi, African grey parrot, bonobo chimp, big eastern bongo antelope, forest elephant, red river hog, driver ants and hairy bush viper.
- Africa has the second-largest rainforest in the world.
- Africa’s rainforests are quite dry. In Africa, rainforests can receive between 63 and 78 inches of rainfall per year, whereas the Amazon has a minimum of 80 inches every year.
- More than 400 species of mammals live in the African rainforest.
- The Congo Basin is home to two types of gorillas - mountain and western lowland gorillas.
